Abs-Track Dev Sign-On Guide

Switch personas locally without Firebase

Persona: All dev personas (coach + 5 member accounts)
Base URL: http://localhost:3010
Generated: 7/25/2026

1. Open the login page

Steps:

1. Go to http://localhost:3010/login
2. If you are already signed in, use Switch persona in the yellow dev banner, or open /login?switch=1
3. The persona picker appears when Firebase is not configured

Links:

- Sign in / persona picker
  http://localhost:3010/login
- Force switch persona
  http://localhost:3010/login?switch=1

2. Coach persona

Full coach access — command center, members, plans, content blocks.

Steps:

1. Click Coach — Helna
2. Lands on /coach

Links:

- Command center
  http://localhost:3010/coach

3. Member personas (pick one)

Each member button signs you in as a different seeded client with their own profile and API token.

Steps:

1. Member — Demo (Hetal plans): default demo account with full plans and check-ins
2. Member — Hetal: pilot client USA, home training
3. Member — Dr. Avinash: pilot client India, gym training
4. Member — Shruti: pilot client Australia, vegetarian home training
5. Member — New (no plans): newly onboarded member, empty dashboard

Links:

- Member dashboard
  http://localhost:3010/member

4. Dev persona quick reference

Links:

- Coach — Helna
  http://localhost:3010/login
  (Then click Coach — Helna)
- Member — Demo
  http://localhost:3010/login
  (member@abstrack.local · has plans)
- Member — Hetal
  http://localhost:3010/login
  (hetal@abstrack.local)
- Member — Dr. Avinash
  http://localhost:3010/login

(avinash@abstrack.local)

- Member — Shruti
  http://localhost:3010/login
  (shruti@abstrack.local)
- Member — New
  http://localhost:3010/login
  (newmember@abstrack.local · no plans)

5. Switch without restarting

Steps:

1. Click Switch persona in the yellow dev banner on any page
2. Or open /login?switch=1 to clear the current session
3. Pick a different persona from the list
4. Coach accounts cannot open /member — use a member persona for the member app

Links:

- Switch persona
  http://localhost:3010/login?switch=1

6. Re-seed profiles & data

Steps:

1. From the web folder run: npm run db:seed
2. Ensures all member profiles, plans, and check-ins exist
