Detailed Business Requirements Document & PRD

Abs-Track by Helna: Complete Technical Blueprint, User Journeys & Wireframe Specs

Author: Product & Engineering Strategy Team
Target Audience: Helna (Founder & Head Coach), Engineering, UX/UI Design, Stakeholders
Document Version: 2.0 | Status: Comprehensive Specification

1. Executive Summary & Operational Scope

Helna manages ~30 hybrid coaching clients across local offline spaces and global time zones (US, Australia, India). Her current reliance on PowerPoint/PDF generation, manual WhatsApp/email check-in threads, and unformatted photo/text meal reviews creates a severe scaling bottleneck. This document provides the granular functional specifications, user journeys, and wireframe descriptions needed to engineer a custom-branded Progressive Web Application (PWA) that automates administration, personalizes acquisition storytelling, and monetizes passive content.

> **Strategic Target:** Reduce administrative hours spent per client by 70%, double inbound conversion efficiency via interactive discovery, and open a self-service global revenue stream.

2. Comprehensive Business Requirements Document (BRD)

2.1 Detailed Stakeholder Use Cases & Acceptance Criteria

Stakeholder / Persona	Detailed Operational Workflow	System Acceptance Criteria
Helna (Lead Coach)	Needs to review 30+ client logs weekly, approve/ tweak AI-flagged meal discrepancies, and assemble custom monthly plans without manual PowerPoint editing.	Dashboard must highlight red-flag clients needing immediate attention; template builder must generate plans in <5 minutes.
High-Ticket Prospect	Lands on PWA via social media (YouTube/ Instagram), evaluates Helna's philosophy, completes an intake quiz, and applies for 1-on-1 hybrid coaching.	Quiz must dynamically qualify users based on location, budget, and goals; route high-intent leads to booking, others to content vault.
Active Hybrid Client	Logs daily/weekly workouts, uploads meal pictures against macro targets, watches assigned exercise tutorial videos, and tracks progress graphs.	Frictionless mobile web upload interface; instant offline support via PWA caching; clear visual indicator of compliance.

Passive Content Subscriber	Purchases lower-tier self-service masterclass bundles or workout vaults using local currency (USD, AUD, INR).	Instant automated account provisioning, secure video streaming protection, and regional payment gateway integration.

3. Comprehensive Product Requirements Document (PRD)

3.1 Granular Functional Modules

- **FM-01: Story-Driven Philosophy Onboarding (P0)**
  Description: Immersive swipe-through/vertical scroll interface introducing Helna's background, hybrid methodology, and core fitness pillars.
  Tech Specs: Responsive CSS snap-scroll containers, optimized WebP imagery, local storage session persistence.
- **FM-02: Interactive Goal-Finder & Fit-Qualifying Quiz (P0)**
  Description: 5-step conversational questionnaire (Goal selection, current bottleneck, dietary preference, location, commitment level).
  Tech Specs: State machine logic in frontend framework, conditional branching, webhook dispatch to CRM/database upon completion.
- **FM-03: Modular Plan Template Engine (P1)**
  Description: Coach dashboard allowing Helna to drag and drop pre-built nutrition blocks (e.g., Indian macro templates, Western meal plans) and exercise modules.
  Tech Specs: Relational database schema linking modular blocks to client user IDs; JSON-based rendering engine on client portal.
- **FM-04: AI-Assisted Check-In Summarizer (P1)**
  Description: Multimodal LLM backend that analyzes uploaded food photos, extracts estimated macronutrients/portion sizes, compares against assigned plan, and drafts summary flags.
  Tech Specs: Secure API integration with vision models, confidence scoring threshold (>85% auto-approve, <85% flag for Helna review).
- **FM-05: Centralized Video & Resource Library (P0)**
  Description: Video vault categorized by muscle group, equipment requirement, and skill level with HLS adaptive bitrate streaming.
  Tech Specs: Cloud video storage, encrypted tokenized video URLs to prevent hotlinking, search and filter indexing.
- **FM-06: Multi-Currency Regional Checkout (P0)**
  Description: Automatic IP-based geolocation detection mapping to localized pricing (USD, AUD, INR) and regional payment processors.
  Tech Specs: Stripe/Razorpay multi-currency API integration, webhook listeners for subscription lifecycle management.

4. UI Wireframes & Persona Journey Specifications

The following wireframe blueprints map out the precise screen layouts and user flows across all core personas.

Wireframe Flow A: Prospect Discovery & Qualification Journey (Persona: High-Ticket Prospect)

- **Screen 1 (Landing / Welcome):** Full-screen immersive background video of Helna training, bold value proposition ("Stop Guessing. Start Transforming."), and primary CTA button: *"Find Your Fitness Path"*.
- **Screen 2 (Philosophy Story):** 3-card horizontal swipe carousel detailing Helna's hybrid philosophy (Nutrition First, Sustainable Movement, Data-Driven Accountability).
- **Screen 3 (Interactive Quiz):** Clean single-question card layout with progress bar at top. Step 1: Primary Goal (Fat Loss / Muscle Gain / General Health). Step 2: Location (US / Australia / India / Other). Step 3: Biggest Struggle (Consistency / Diet / Time).
- **Screen 4 (Dynamic Outcome Result):**
  - *If High-Intent / Local Hybrid:* "You are a perfect fit for 1-on-1 Hybrid Coaching." Displays calendar booking widget and WhatsApp direct connect.
  - *If Passive/Low-Budget:* "Unlock the Self-Paced Content Vault." Displays instant purchase card with localized currency (e.g., ₹2,999 / $49 AUD / $35 USD).

Wireframe Flow B: Active Client Daily Check-In Journey (Persona: Hybrid Coaching Client)

- **Screen 1 (Client Dashboard Home):** Top greeting banner with streak counter and compliance percentage. Quick action card: *"Submit Today's Check-In"*. Bottom navigation bar: Dashboard, Workouts, Nutrition, Messages.
- **Screen 2 (Check-In Submission Hub):**
  - Field 1: Upload Meal Photo (Camera icon opening native file picker or camera).
  - Field 2: Weight & Daily Metrics (Numerical input fields with previous week's baseline for reference).
  - Field 3: Quick Slider (Energy levels 1–10, Soreness 1–10).
  - Button: *"Send to Coach Helna"*.
- **Screen 3 (Assigned Workout / Video Library):** Filter tabs (Chest, Legs, Core, Home Routine). Selecting a video opens an embedded player with instructional bullet points and set/rep tracker checklist underneath.

Wireframe Flow C: Coach Management & Automation Journey (Persona: Helna)

- **Screen 1 (Coach Command Center):** Master list of 30 clients sorted by compliance status. Color badges: Green (On Track), Yellow (Missing Data), Red (Flagged by AI Check-In Summarizer).
- **Screen 2 (Single Client Review View):** Split screen. Left side: Client's uploaded meal photo and AI-parsed macro breakdown vs. Target macros. Right side: AI-generated summary draft ("Protein intake was 15g low on Tuesday; overall trend is positive."). Action buttons: *[Approve & Send Feedback]* or *[Edit Comment]*.
- **Screen 3 (Plan Builder Dashboard):** Drag-and-drop modular interface. Left drawer containing pre-approved nutrition meal blocks and exercise templates; right canvas representing the client's monthly program. Export/Publish to client app with one click.
