HETAL PATEL : PHYSIQUE TRANSFORMATION

Nutrition · Training · Mentoring

WEEK 1-21 – 26 Jul 2026 · Min: 6k – 8K steps

WORKOUT GUIDELINES & RECOVERY

Workout Guidelines

- Superset format: complete 1A 1B 1C (1D home circuits), then rest 40-90 seconds.
- Engage core on every resistance exercise - brace before each rep.
- Warm up 5-8 minutes before resistance work.
- Cool down and stretch after every session.
- Step goal: 8,000-10,000 steps daily (see plan cover).
- Hydrate during training - 500ml water minimum.
- Stop if sharp pain occurs; modify range of motion and notify Helna.

Foam Rolling & Stretching (Pre/Post Workout)

- Foam roll - quads: 30 seconds each leg
- Foam roll - IT band: 30 seconds each side
- Foam roll - upper back (thoracic): 30 seconds
- Hip flexor stretch: 30 seconds each side
- Chest doorway stretch: 30 seconds
- Hamstring stretch: 30 seconds each leg
- Child's pose: 45 seconds

Open in app

Cardio Finisher Options

- LISS walk or incline treadmill: 20-30 minutes
- Stationary bike: 15 minutes moderate pace
- 5 km walk outdoors (Avinash W1 active rest)
- Bodyweight cardio circuit (Shruti home format)
- Keep heart rate conversational - you should be able to speak in sentences.

NUTRITION · WEEK 1

Calories	Protein	Carbs max	Fat
1350-1450	60-90g	<=150g	40-45g

Welcome to Abs-Track

Welcome Hetal Patel! Your personalized program runs 2026-07-01 - 2026-10-31. Together we'll work on: Reduce inflammation, Osteoporosis support, Iron intake. Daily check-ins and open communication are the foundation of your success.

Success Strategies

- Communicate openly with Coach Helna - no question is too small.
- Complete daily check-ins: morning weight, sleep hours, meal photo.
- Log meals in Abs-Track Nutrition - tap + Add on each meal (breakfast, lunch, dinner, snack).
- Plan groceries weekly; prep proteins and vegetables in advance.
- Review your plan each Sunday; message Helna if travel or events disrupt routine.

Optional: MyFitnessPal

- Prefer MyFitnessPal? You can keep using it alongside Abs-Track.
- Abs-Track Nutrition is your primary log for coach review - log here first when possible.
- If you use MFP only, mention it in messages so Helna knows where to look.

Open in app

- Weekly exports from MFP can be shared with your coach on request.

Understanding Your Macro Targets

- Calorie range is a target band - not a single number to hit exactly.
- Protein is the priority macro - aim for the minimum daily, spread across meals.
- Keep carbs at or below your weekly maximum unless coached otherwise.
- Healthy fats support hormones and satiety - do not eliminate.
- Adjustments happen weekly or fortnightly based on weight trend and energy.

Sample High-Protein Dishes

- Greek yogurt + berries + almonds (~22g protein)
- Grilled chicken + roasted vegetables + quinoa (~28g protein)
- Lentil dal + small brown rice portion (~18g protein)
- Egg white omelette + spinach + wholegrain toast (~24g protein)
- Paneer tikka + salad (~20g protein)
- Target 20-25g protein per main meal.

Core Nutrition Principles

- Eat every 3-4 hours to stabilise blood sugar.
- Fill half your plate with non-starchy vegetables.
- Choose lean protein at every meal.
- Limit liquid calories - juices, sweet coffee, alcohol.
- Hydrate: 2-3 litres water daily; more on training days.

Open in app

- Eat slowly; stop at 80% fullness.

Weekly Grocery List

PRODUCE	PROTEIN	PANTRY	OTHER
Spinach	Eggs	Oats	Green tea
Broccoli	Chicken breast	Brown rice	Dark chocolate 85%
Bell peppers	Greek yogurt	Olive oil	Herbal tea
Berries	Lentils	Almonds	
Bananas	Paneer	Turmeric	
Onions	Fish fillets	Mixed spices	
Tomatoes			

Health Considerations - Hetal

- Focus areas: Reduce inflammation; Osteoporosis support; Iron intake.
- Health notes: Osteoporosis (early stage), mild knee discomfort on long walks
- Allergies: Lactose intolerant
- Medications / supplements: Vitamin D, calcium supplement
- Diet preference: hybrid.
