Abs-Track Coach User Guide

For Helna and coaching staff

Persona: Coach (dev: Enter as Coach on /login)
Base URL: http://localhost:3010
Generated: 7/26/2026

1. Sign in

Steps:

1. Open http://localhost:3010/login
2. Local dev (no Firebase): click Coach — Helna
3. Production: Continue with Google using an email listed in COACH_EMAILS
4. You land on the Command center at /coach

Links:

- Sign in
  http://localhost:3010/login
- Command center
  http://localhost:3010/coach

2. Daily workflow — review check-ins

Review member daily check-ins (weight, sleep, meal photo, AI analysis).

Each row shows 7-day sparklines, a compliance mini-ring, and Needs attention when trend rules fire.

Approve or flag items that need follow-up.

Steps:

1. Open Command center
2. Scan the left queue — member name, status, sparklines, and alert badges
3. Select a check-in — review meal photo, AI summary, and today's food diary totals
4. Add a coach note (optional) and click Save note
5. Click Approve (animated) or Flag for follow-up
6. On flagged or at-risk check-ins, open Quick-fix recipes to append a meal suggestion to your note
7. Filter by member or open Full history for one client

Links:

- Command center
  http://localhost:3010/coach

3. Brand, voice & coach note (Settings)

Configure tenant accent colors and post an optional mindset note for all active members.

Dual accent: separate workout (teal) and nutrition (green) colors. Single accent: one brand color with derived secondary.

Coach note appears on member dashboards only when active — not required daily.

Steps:

1. Open Settings from the top navigation bar (visible on every coach screen)
2. Choose Dual or Single accent mode; pick colors
3. Configure calendar defaults and optional Google Calendar connection
4. Enter an optional coach note (text) and optional audio URL
5. Click Save settings — members see the note on their dashboard
6. Download how-to guide (PDF) for a plain-language reference

Links:

- Coach settings
  http://localhost:3010/coach/settings

3b. Calendar & appointments

Custom in-app calendar for client appointments — not a Cal.com embed.

Block one-off times, whole days/weeks, or recurring weekdays (e.g. every Sunday).

Meeting types: in person, Google Meet (auto when Google connected), Zoom, WhatsApp, or none.

Optional Google Calendar OAuth mirrors appointments and blocked time to your Google calendar.

Steps:

1. Open Calendar from the top navigation bar
2. Drag-select on the week grid to create an appointment or block time
3. Set meeting type, location, and join link defaults under Settings
4. Connect Google Calendar under Settings for Meet links and busy-time sync

Links:

- Coach calendar
  http://localhost:3010/coach/calendar
- Coach settings
  http://localhost:3010/coach/settings

4. Member roster & profiles

View all clients by status: active, paused, or new enquiries from the quiz.

At-risk clients show a Needs attention badge (sleep decline, missed check-ins, low protein).

Open a full editable profile: contact, program dates, program phases, goals, health, coach notes.

Steps:

1. Open Members from the top navigation bar or Plan delivery !' Clients tab
2. Use tabs: Active clients | Paused / inactive | New enquiries
3. Click a client to open their profile
4. Set program start/end dates and edit program phase labels and date ranges
5. Edit fields and click Save profile
6. Review food diary summary and check-in history on the profile page
7. Use Plan delivery on the profile to build or publish plans

Links:

- Members list
  http://localhost:3010/coach/members
- Example profile
  http://localhost:3010/coach/members/{member-id}
  (Replace {member-id} with a client UUID from the list)

5. Plan delivery

Build and publish weekly training and nutrition plans for each client.

Plan delivery tabs (Clients, Content blocks, Exercise catalog, Pilot metrics) stay visible on every plan-delivery screen.

When editing a client's plans, the page shows their name so you always know who you are working on.

Use gym or home templates for a full week, then personalise.

After publish, Prepare delivery to send one PDF pack by email, WhatsApp, or link.

Steps:

1. Open Plan delivery and choose a client
2. Training: + Gym/Home template (or clone last week), edit, Save & publish
3. Nutrition: set macros, attach content blocks, Save & publish
4. Back on the client plan hub !' Prepare delivery
5. Preview PDF, Send email, Send on WhatsApp, or Copy link
6. Members see a new-plan banner and can download the PDF in the app

Links:

- Plan delivery hub

http://localhost:3010/coach/plans
- Training builder
  http://localhost:3010/coach/plans/{member-id}/training
- Nutrition builder
  http://localhost:3010/coach/plans/{member-id}/nutrition
- Client plan hub
  http://localhost:3010/coach/plans/{member-id}

5b. Vault programs (storefront)

Manage the public /programs catalog — self-paced packs for prospects not ready for 1-on-1 coaching.
Six demo families are seeded (busy professionals, post-delivery, weight loss, core, nutrition course, travel).
Buy Now uses waitlist until Stripe checkout (Phase 2).
Steps:

1. Open Plan delivery !' Vault programs (or /coach/vault)
2. Expand Storefront copy to edit hero headline, trust stat, and coach story
3. Expand a program to edit title, description, publish toggle, and SKU pricing
4. Save program / Save pricing / Save storefront
5. Preview at /programs and /vault/[slug]

Links:

- Vault admin
  http://localhost:3010/coach/vault
- Public catalog
  http://localhost:3010/programs
- Example deep link
  http://localhost:3010/vault/stay-fit-busy-professionals

5c. How-to guide PDF

Download a plain-language guide covering coach, member, and new-member journeys from Settings.
Steps:

1. Open Settings
2. Click Download how-to guide (PDF)

Links:

- Coach settings
  http://localhost:3010/coach/settings

6. Content library & exercises

Reusable blocks (welcome letters, nutrition tips, quick-fix recipes) attach to nutrition plans.
Success strategies and nutrition tips prioritize Abs-Track food diary; MyFitnessPal is optional.
Exercise catalog: expand a row to edit or delete YouTube-linked movements.
Steps:

1. Content blocks: tap a block to expand, edit body text, Save changes
2. Exercises: expand a row, edit fields, Save, or Delete

Links:

- Content block library
  http://localhost:3010/coach/content-blocks
- Exercise catalog
  http://localhost:3010/coach/exercises

7. Pilot metrics

Track plan publish duration and pilot KPIs for Abs-Track.
Links:

- Pilot metrics

_ http://localhost:3010/coach/pilot

8. Switch persona (local dev)

Steps:

1. Click Switch persona in the yellow dev banner, or open /login?switch=1
2. Pick Coach — Helna or any Member persona
3. See dev-sign-on-guide.pdf for the full persona list

Links:

- Switch persona
